FRIDAY, SEPTEMBER 7, 1923

## SIERRA MADRE PEOPLE OFFER AID FOR JAPANESE SUFFERERS; RED CROSS QUOTA IS \$1,000

Sierra Madre Chapter of the American Red Cross will receive payments for Japanese earthquake and fire relief at the Sierra Madre Savings bank.

One thousand dollars is the quota assigned to Sierra Madre, according to Mayor Robert Mitchell, local chairman of the Red Cross organization.

The great disaster which has overwhelmed Japan in the destruction of her chief cities and the death of more than a quarter of a million persons, has caused a large number of Sierra Madre people already to volunteer contributions. Within a few hours after the circulation of the morning papers telling of the tragedy, people began calling up the News office to inquire where they could make their payments.

The prompt and generous aid given by the local Japanese residents to every appeal for the Red Cross and other causes during the war is recalled by all who were in touch with those activities. Every drive and patriotic appeal met with ready response from them. They made large contributions, individually and as a body. It is urged that the spirit shown by them be equalled if not surpassed in meeting the emergency which has fallen upon their countrymen and relatives.

As head of the Red Cross chapter, Mayor Mitchell will probably call a meeting of workers to organize a campaign committee to solicit funds for Sierra Madre's quota. Sierra Madre has never yet fallen down on such an assignment. Every drive went over the top in splendid shape.

Volunteer contributions will greatly assist the Red Cross organization and cut down the work of solicitation. Citizens are urged to make their payments promptly and not to await the arrival of a solicitor or mail appeal.

No calamity in modern times has equalled the Japanese earthquake in extent or loss of life. Owing to the distance and interrupted communication, the details are still comparatively meager. As they sift through by cable and radio, the disaster loses nothing in its appalling horror.

Differences of opinion over race questions are lost sight of in the universal impulse to aid suffering humanity. Questions of immigration or business competition are lost sight of. They have no place in consideration of the thing to be done in a great emergency like this.

Checks should be made payable to "Japanese Relief Fund, A. R. C." and may be sent either to Chairman Mitchell or to the Sierra Madre Savings bank, and due credit will be given.

### CITRUS GROWERS PREPARE FOR HEATING ORCHARDS

Farm Bureau Says Now Is the Time to Plan Protection Against Winter Frosts

The best time to prepare for adequate frost protection for the coming winter is during these nice warm summer days. It is a fact that five years out of ten, damaging frosts have occurred in citrus districts in November. Equipment should be ordered not later than September 15th in order to be sure of having it in the orchard in time to give full protection.

For growers in cold districts, even those where damaging freezes occur only once in a decade, there is no kind of an investment which pays higher dividends than adequate frost protection. The cost of equipment varies with the risk and the type installed, but good protection can be had for from \$150 to \$300 per acre including fuel for three or four nights firing.

Briquet heaters are satisfactory for small places and should be installed at the rate of one hundred to the acre. Two to three tons of fuel per acre should be in the field at all times. If oil heaters are used for average districts the grower will need enough heaters to give him at least four hundred gallons per acre of oil in the field. Storage capacity should be sufficient for three additional heater fillings.

The Agricultural Extension Service is planning a frost protection campaign, part of which will consist of a series of demonstrations on efficient orchard heating. These demonstrations will be held about November first and instruction will be given in the use of different types of equipment.

The Agricultural Extension Service will be pleased to put growers in touch with manufacturers of heating equipment and give them information with regard to heating methods.

Mrs. M. D. Welsher of 517 West Highland, and Miss Mattie Seeley of 453 W. Manzanita, accompanied by their nephew, Fehse, Seeley of Kingman, Arizona, left Friday for San Francisco. Mr. Seeley will return with them.

Mrs. Catherine Humphries of 81 East Grand View returned Friday after spending a couple days in Santa Barbara and several days in Los Angeles visiting her four daughters.

### BOOZE IS SPILLED DOWN THE GUTTER

In the presence of a large crowd of spectators, city officials poured about 160 gallons of red wine down the gutter last Saturday morning. The stuff was the collection gathered from the cavern beneath the goat pen of L. Farinacci, by City Marshal Udell, with the assistance of L. E. Steinberger, Jr., and Constable Quiggle, and which brought fines of \$500 upon Farinacci and his son-in-law, A. Mariotti. The ceremony was carried out by Marshal Udell, in the presence of Mayor Mitchell and Judge Forman who assessed the fines. The bottled and barreled liquor was brought to the place in the city truck, which later hauled off the broken containers.

Opinion of the spectators varied as to the merits of the liquor disposed of. There was no opportunity for sampling, and the tests were by smell only. Some self-confessed competent judges said it was a rotten shame, and others said the wine smelled rotten. After the last of it had gone down the gutter the fire hose was turned on as a chaser, to prevent contamination of the gutter.

### NEW WATER MAINS IMPROVE THE SERVICE

Three important links in the program of improving the city water distributing system have been completed under direction of Superintendent Tom Henderson. These are a 6-inch main on Montecito between Baldwin and Mountain Trail, a 4-inch main on Laurel between Adams and Lima, and 500 feet of 4-inch main on Sunnyside below Central.

These mains will serve property which has had no connection with the city system except by going across lots to other streets. They will also give better pressure to the districts affected by improving the circulation of water.

For the benefit of the dwellers on the Scenic Point knoll and other property above the Carter avenue line, the Kewanee pressure system is being improved and enlarged with larger transformers and motors. This will provide for the lifting of water from the Carter avenue main to the new tank at the foot of the quarter-way line. An adequate and constant supply will be given to a large territory where pressure has always been weak and water often not available for many hours at a time.

### RALLY WEEK PLANS OF CONGREGATIONAL CHURCH

Active planning for the beginning of fall activities will occupy all next week for the various departments of the Congregational church. With the return of Superintendent James Farndale of the Sundal school, a conference of the Teachers' Club was held at the Karicofe home last night. Plans were made for a teacher training class with expert instructors, through the fall and winter.

All the organizations of the church will meet with the minister, Dr. William A. Tate, during the week to come, and map out a definite program of activity in all lines. These conferences will culminate in a big get-together dinner and social evening on Friday.

Next Sunday morning Dr. Tate will talk on the Constitution and Americanization, in conformity with the request for the observance of Constitution week. He will pay particular attention to the appeal of the Red Cross for Japanese relief.

## W. P. Caley Writes of Trip To England and Scotland

The editor of the News has received an interesting letter from W. P. Caley of Sierra Madre who went across the Atlantic to visit his ancestral home on the Isle of Man, and other places. The letter was written at sea and mailed at Liverpool and is as follows:

Canadian Pacific S.S. Montrose, August 10, 1923  
My Dear Friend: I promised to write you when I arrived on the other side of this large pond of water. I left Cleveland on July 31, arrived at Buffalo, N. Y., August 1, spent the day at Niagara Falls, took the 15-mile trolley trip on the Canadian side which I enjoyed immensely, and took the Canadian Pacific for Montreal. I arrived there the next morning and spent the day sightseeing. A fine city and sociable people.

Next morning I left at 10 o'clock on the steamer and spent two days on the St. Lawrence which is a grand piece of scenery, long to be remembered. At 10 p.m., the steamer stopped at Quebec to take on passengers and mail. Next morning we were well out to sea.

On the third day we passed Labrador where it was terribly cold. Large ice bergs floating in the sea looked like castles and the sun shining on them made them yet more beautiful. Next day we passed Belle Isles and have seen no land since.

We have 200 cabin passengers and 85 steerage. We have music and different kinds of games, a fancy dress ball, and last evening a concert. On Sunday we had services and in the evening the Salvation army held a service on the lower deck for the third class passengers.

The Canadian Pacific steamers are great for feeding their passengers. At 8 a.m., breakfast, at 10, tea and sandwiches and cakes, at 1 o'clock a fine lunch, at 3, tea and cakes, with dinner at 8 p.m.

The only passengers we have on board from close to home are Dr. and Mrs. E. C. Norton of Claremont. Dr. Norton is dean of Pomona College, has been with the college 35 years and is a great friend of Dr. Campbell and the Humphries family. I happened to find their names on the cabin passenger list so we had a nice visit.

It is just like one large family on shipboard, all friendly to each other. We have the printed news before us each day at lunch time, received by radio. We did not learn of the president's death until we were out at sea.

This is Friday, August 10, and we sighted Ireland at 6 a.m. We will land at Liverpool at 6 a.m. The passport agent comes out to meet the steamer, examines our passports and baggage.

We had a great many seasick peo-

### ROMANCE OF ELECTRICITY TO BE TOLD AT CLUB HOUSE

"The Romance of Electricity", an illustrated lecture, will be given in the Woman's Club House Friday evening, Sept. 14, under the auspices of the Firemen's Club. The lecturer will be W. G. Blossom of the So. Cal. Edison Company. Mr. Blossom has been heard in Sierra Madre before, and was greatly enjoyed. He is constantly gathering new material and all who have heard him in the past will doubtless welcome an opportunity to hear him and see his wonderful collection of pictures on the screen again. He shows the entire process of the development of hydro-electric power in the high Sierras, its transmission across the desert and mountains, and distribution in the city and country districts of Southern California. No admission charge is asked for this lecture.

Mr. and Mrs. Louis Karpf and family of 375 East Grand View, are returning Sunday from Venice where they have been spending the summer.

ple for two days. They all appear to be O.K., now.

I will go to Douglass, Isle of Man, upon my arrival. Will stay about 10 days at my father's birth place. I will then go to Scotland to visit the old homes of my wife's father and mother at Rosslyn and Stenbar, then to my mother's birthplace at Cornwall, England. Her father was a coast guard for the English government. Will then visit London and Paris, and then go to Southampton to sail for New York. By doing this I go one way and return another.

I left Mrs. Caley and Hilda in Cleveland with Maybelle (Mrs. Chas. Hawkins). But they were to return with her to her home at Painesville.

It will seem good to get back to dear old Sierra Madre. Well, I will close and will try to write again before I return to the states. Best regards to all.

YOUR FRIEND, CALEY

### PETER SCHWEICH SUCCUMBS TO A HEART ATTACK

Peter Schweich, a resident of Sierra Madre for about 14 years, passed away suddenly on Monday afternoon, the victim of some weakness of the heart. He had been apparently in his usual health, chatting with friends only a short time before, but had complained of pains in the region of the heart. He had gone about his evening chores as usual, and dropped over without warning as he was returning to the house.

Mr. Schweich was formerly a resident of Hastings, Minn. He is survived by his wife and four children, John W. Schweich of Los Angeles, Jacob P. Schweich of Lakeville, Minn., Mrs. R. M. Tanner of Los Angeles, and Mrs. M. J. Dykzeul of Riverside, Cal.; also by one brother, Matt T. Schweich of Hastings, Minn., and one sister, Mrs. Joseph Pine of Pierce, Minn.

Rosary was said at the undertaking parlors of Bergien & Cabot, and funeral services were held in St. Rita's church Thursday morning.

### FULLER BRUSH MAN HERE

O. E. Kaselock, representing the largest brush concern in the world, is calling on every home in the city with presentation of complimentary brush.

Last season the total business of this concern was \$12,000,000; this year \$16,000,000 will easily be reached. This gives an idea of the gigantic business this company does, and shows that their products have the confidence of the public. See the Fuller Brush advertisement in this issue.

Mr. and Mrs. Samuel Gerson, formerly of 600 East Grand View, have removed to Los Angeles.

### SIGNS AND SIMPLETONS UP IN THE MOUNTAINS

How It Looks to the Forest Ranger Who Sees What Is Going on There

By Ranger Bill, U. S. Forest Service  
"Did you ever notice how many people there are who seem to have a weak cog somewhere in their make-up?" said Ranger Bill as he threw a bunch of new enamel signs that had been shot full of holes into the wood shed. "Mind you, I don't claim such folks are what you would call 'foolish,' but they sure must lack good sense to pull some of the tricks they do. Of course sometimes it's due to thoughtlessness, but pure cunningness would be more like it, I reckon, in a good many cases."

"Who'm I alluding to? Why, just them folks, big and small, that go around shooting up signs and writing their names on rocks and trees and buildings and any old handy place. We get a lot of them up here on the National Forests in the summer time—natives and city people and 'dudes' out on a vacation, who either think it's smart to make a pepper box out of a sign or else want to leave a monument to themselves by scribbling all over the landscape. You know that old saying about 'Fools names . . . ?'"

"You think I'm putting it too strong? Well I don't. If you could trade places with me for a season and see some of the stunts of these vandals, you'd know why I get hot under the Stetson. Let's look at this business with common sense. Here's the Forest Service and the automobile associations of the State spending a lot of good money each year to put up fine enamel signs so that our own folks and all the people who visit California can tour around in the mountains without getting lost. Then along comes some smart Aleck with a gun and—bang! bang!—another sign is shot full of holes and ready for the ash heap. It isn't only one, but thousands of them that get made into a sieve that-a-way. Seems like these fellows would appreciate rather than depreciate a sign, and think a bit about the people that's coming after. Every time a sign is badly defaced a new one has to be made and put up, and that means more money and work. Once in a while we catch these birds, and the way the Judge usually hands it to them sure does a man's heart good. If there is anyone that ought to get it, and get it good, it's these sign poachers."

"Now look at those autograph sharks and some of their work. Why only last week I found the name of a professor in one of our big state universities scribbled over the newly painted door of a lookout station up at 10,000 feet. What do you suppose his idea was? If he wanted me to know he'd called why didn't he leave a card or write on a piece of paper? If I can tie-in with him I'm sure going to make him back-track up there and scrub that name off with Sapolin. Just you stop and take a peek at that big Forest Service sign down at the forks of the road. I only put it up this spring, and you'll find a regular telephone directory scratched all over its face. No, sir, it ain't the kids that pull all this stuff, but real grown up men and women who ought to know enough to respect other people's property."

"A fellow was telling me the other day that the temples in Egypt have all kinds of names and pictures that senseless people scratched on the stones three or four thousand years ago. I always thought we'd kind of advanced in civilization since then, but it 'pears like we've got simpletons in these days same as they had back in King Tut's time."

Mr. and Mrs. F. B. Seeley of 45 W. Manzanita have as their house guest Mr. Seeley's son, Charles Seeley of Kingman, Arizona.

When the Devil Is Sick.  
We have no doubt that angels in heaven realize that people on this earth who pray only when they get into trouble are more yellow than pious.—New Orleans States

## Crowds Going To View Total Eclipse of Sun

"Where are you going to see the eclipse?" is a common question these days.

Those who ask it take it for granted that everybody else is as interested as themselves. They cannot see why anybody could be other than eager to witness the unusual phenomenon, or hesitate to brave the perils of dense auto traffic and long travel.

Three points are named as most convenient and accessible—Catalina island, San Diego and Santa Barbara. The edge of the shadow will barely touch the mainland at Hueneme also. To all these points every available mode of travel will be overworked next Monday, Sept. 10.

At Hueneme the duration of totality will be less than half a minute. At Santa Barbara about 50 seconds; at Avalon, 2 minutes 48 seconds; at San Diego, 2 minutes 57 seconds.

### Southern Points Best

Practically all the scientific expeditions from the big observatories have established observing stations at or near San Diego. This is taken by many to indicate that scientists expect most favorable conditions there as well as the longest duration of totality.

In Sierra Madre and other inland points the eclipse will be from 95 to 99 per cent total. With a smoked glass the sun will be seen as a thin crescent. It will be too bright for observation without a dark glass.

Observers at all points are cautioned to be extremely careful about the use of a smoked or very dark colored glass. The tiny lens of the eye serves as a magnifying glass which is liable to cause serious and permanent injury to the retina if one looks at the sun even when it is dimmed by the partial eclipse. During the period of totality the corona may be observed without the colored glass.

### FATHER HANLEY COMES TO ST. RITA'S PARISH

Rev. Father Peter Hanley, one of the order of the Passionist Fathers, arrived in Sierra Madre this week to take charge of the work of St. Rita's parish. Other members of the order are expected at once, and will carry on the work of Father Woodcutter who was transferred to the Altadena parish.

Father Hanley has occupied important posts in Kansas and in Texas. In leaving his most recent parish at Beeville, the cordial expressions of his townsmen elicited a farewell letter in the local paper, in part as follows:

"When I came to Beeville I found a very good spirit existing among those of different religious and political creeds. That same spirit, by work and example, I have encouraged and fostered in every manner consistent with my vocation in life. My Catholic training, in which my thoughts and my character have been moulded, always taught me to love my neighbor, forbade me to hate him, and exhorted me to condemn and denounce bigotry and prejudice as the enemies of the religion of Him who said: 'By this shall all men know that ye are my disciples, that you love one another.'"

Father Hanley expresses himself as greatly pleased with the new parish.

Mrs. Catherine Humphries of 81 E. Grand View had as dinner guests Wednesday evening, Mr. and Mrs. Alfred Elwood of Los Angeles and Mrs. Michael Walsh of Waurika, Oklahoma.

Mrs. Theo. Koch of 126 E. Laurel and Mrs. J. H. Huber of East Pasadena returned from Catalina Saturday after spending a couple days there.

## Of Local Interest

Mr. and Mrs. W. H. Morrow and daughters of 118 N. Lima, are enjoying a week's vacation on Catalina Island.

Mrs. C. E. Cook and Miss Gertrude Cook have returned to their home at 147 W. Central after spending two months in Pasadena.

J. F. Sadler and son, Stafford C. Sadler, accompanied by Victor Simank of Pasadena, are expected to return Sunday from Grant Lake, where they have spent the past week fishing.

Mr. J. W. Jameson returned this week from a ten days visit with Mrs. Jameson in Humboldt county. Mrs. Jameson is motoring down with her niece, Mrs. Julius Moore, who will be remembered as Miss Meta Smith.

Mr. and Mrs. Victor Hill left yesterday morning for Chileo where they will occupy their cabin among the pine trees. The cabin was somewhat damaged by a falling pine tree last spring, and the repair work will afford plenty of occupation during their outing.

St. Rita's chapel was the scene of a largely attended double wedding Saturday night, when Miss Bertha Gregoire became the bride of Mr. William Ramirez, and Miss Augustina Gregoire became the bride of Mr. Jasper Lee Cowgill. The ceremony was performed by Rev. Father Woodcutter.

Mr. and Mrs. George A. Jones and family, who have been occupying the Hope residence for several months, have moved into their delightful new bungalow at 285 East Central. Making the move to the new home doubly delightful was the return home of Mrs. Jones whose ill health had necessitated a prolonged stay in a sanitarium. The bungalow is one of the most complete and well planned which has been erected in Sierra Madre for some time.

### CIVIC ASSOCIATION DINNER AND OPEN FORUM TONIGHT

An unusually large number of reservations for the Civic association dinner tonight indicates the return of many members from vacation with renewed interest in these monthly community gatherings, where entertainment, informal discussion and friendliness combine to develop the city's most valuable asset, a fine community spirit.

J. R. Bayley, for eleven years soloist with the Minneapolis Symphony with Mrs. Bayley at the piano, will play the "Magnolia Serenade" by Missud, and "Columbia," by Rollinson, and will accompany the community singing.

The open forum will be conducted by E. E. Bacon. Mr. G. M. Lorraine, city manager of Alhambra, will be the association's guest and give a short talk on city management.

### COUNTY ATTEMPTS DISTRICT CONTROL OF FIRE DANGER

That Los Angeles will lead the United States in the matter of protection against fires was indicated Tuesday when the board of supervisors took the initial step in an extended campaign of county-wide organization in checking and combating destructive fires.

The board created 21 new fire districts, to cover virtually the entire county. At each of these districts a deputy fire warden will be stationed constantly. In addition each will be equipped with all necessary fire fighting apparatus and motorized equipment.

In this manner the county will be thoroughly patrolled and guarded against the fire menace. In the event of a fire the nearest station will be notified, thus eliminating much of the present delay in reaching fires in outlying districts. Should the fire prove of such a nature that additional aid is needed, other stations can be notified and additional help and apparatus secured.

Action was taken by the board at the request of citizens residing in the various districts where the new stations are to be located. This is in accordance with the law passed by the last legislature at the instance of Fire Warden Flintham, who pointed out the serious losses incurred by the state annually by reason of fires which might be prevented if the proper facilities and equipment were available.

The law provides that residents of the districts must signify their desire for such stations before they can be established. The cost of manning and equipping these stations will fall on the districts where they are located.

Each of these districts comprises a territory of from one to three square miles. One of the stations will be located at Signal Hill and another at Santa Fe springs. These are necessary by reason of the constant danger from oil and gas fires. It is expected large savings will result for the oil operators.

The other stations will be located as follows: Belvedere, Belvedere Gardens, Clearwater, Downey, Green Meadows, LaCrescenta, Lankershim, Laguna, Lawndale, Lomita, Miramonte, Newhall, Norwalk, Palmdale, San Dimas, Santa Monica canyon and Sunland.

The nearness of some of the stations to the Sierra Madre mountains will make them valuable in the unceasing fight to keep fire out of the mountains. They should prove valuable allies to the forest service in this respect.

FUN FROM THE PRESS.

COMEDY

**DOROTHY DALTON** with **DAVID POWELL**, in  
"FOG BOUND."

Out of the fog come mystery, romance, adventure—dripping with colorful incidents, gripping with intense power, zipping along at a swift pace. Exquisite scenes at Palm Beach, society's winter playground. A picture of swarming thrills, leaping on to a crashing climax. The primitive adventures of an island wilderness, the silken intrigue of smart society—it's vibrant with both.

Tuesday and Wednesday, September 11, 12

COMEDY

Another great success for the Colonial, a **WILLIAM DE MILLE** production, "THE MARRIAGE MAKER," with **AGNES AYRES** and **JACK HOLT**.

Supported by Charles de Roche, Mary Astor and Bobby Agnew. Screen play by Clara Beranger, from Edward Knoblock's play, "The Faun."

The play that proved the most popular ever played by William Faversham. A story that strips the tinsel from modern society and shows we're only human after all. A big, dazzling, startling production in every sense of the word.

Thursday, Friday and Saturday, September 13, 14, 15

A FINE COMEDY

Saturday only—**REGINALD DENNY**, in "THE LEATHER PUSHERS."

The Colonial scores again. Yes, you've been waiting for this one, the greatest kiddie in the world in the greatest picture he ever made, **JACKIE COOGAN** in "CIRCUS DAYS," from the story, "Toby Tyler."

Marvelous feats—clowns, animals, freaks, wonders, surprises, acts of daring. Stupendous scenes of circus life—drama, romance, surprises, fantastic loop-the-loops.

Gigantic stunts—tremendous movement—elephants, 50 trained horses—90-foot high divers. Colossal action all through—grandeur—fun—frolic and mirth—magnificent bare-back riders. Momentous, absolutely his greatest picture, nothing like it ever done before—it's wonderful. The greatest show on earth.

## EDISON-FORD PLAN'S ATTACK ON INTEREST

Abolition of Rent No More Plausible Than Abolition of Pay on Loans, Expert Shows.

It is no more unreasonable to pay interest on a loan of money than to pay rent on a house, declares William T. Foster, Director of the Pollack Foundation for Economic Research, in exposing the fallacy of the attack on interest charges by Henry Ford and Thomas A. Edison in their commodity money scheme to do away with the present financial system. Mr. Foster's argument is reviewed in the present article which is one of a series prepared by the American Bankers Association.

"The Ford-Edison commodity money plan is regarded as a step toward the abolition of all interest charges," Mr. Foster says. "Interest," says the Dearborn Independent, "is a tax that few ancient tyrants would have dared impose. Interest in actual modern practice is a contrivance whereby all production is taxed by parasites, and whereby money is given a supremacy over men, material and management which it cannot sustain."

### Renting Money

"But is there really anything more terrible about paying for the use of money than about paying for the use of anything else? Suppose a farmer finds himself in need of a harvesting machine, and without enough money to buy one. In that case he can either borrow a machine of Neighbor Brown or borrow money and buy a machine. The farmer would consider it right to pay in some way for the use of the machine. Why should he expect to borrow money—which is honored in the markets in payment for the same machine—without paying for the use of the money?"

"Now let us suppose that the farmer uses the machine so successfully that he saves a thousand dollars. With that money he can buy a farm and he can let Neighbor Brown have the use of it. Neighbor Brown naturally would expect to pay rent. Instead of buying the farm, however, he could lend the thousand dollars to his neighbor in order that his neighbor might buy the farm. In that case Neighbor Brown should expect to pay for the rent of the money. All this seems clear. When the transactions are as simple as these it is plain that there is just as great propriety in charging for the use of money as in charging for the use of things that money will buy."

### Loaned Money Builds a School

"We may assume, however, that the farmer does not want to buy land and Neighbor Brown does not want to borrow money. In that case the farmer deposits his thousand dollars in a bank and the bank pays him interest for the use of his money. But the bank can pay interest only if it makes profitable use of his money. Now the bank finds that the city needs a high-school building, and has decided to borrow enough money to construct it. In order to obtain the money the city has issued bonds, each of which is a promise to pay one thousand dollars at a specified date, and interest in the meantime at a specified rate. The bank buys one of these bonds. Thus the farmer has had a part in providing the city with a school building; and the farmer has just as much right to expect interest for the use of his money as though he had loaned the money directly or indirectly to Neighbor Brown."

## "CAPITALISTS"—AND DON'T KNOW IT

A good many people who rail against capital are beating their own backs. Some are savings bank depositors; some have shares in building and loan associations; some have bought a liberty bond; some have ordered a stock of goods for their store. All of them, without knowing it, have performed a great miracle, for they have turned the work of their hands or their brains into a new product which, while it helps them, is helping thousands of others. Every one of them is a capitalist as most of us are—unless we are tramps or paupers or ne'er-do-wells—and we may well be proud of the name. For capitalism, instead of being the devilish invention of a few selfish interests, is the great material force that has lifted millions from poverty, degradation and slavery.

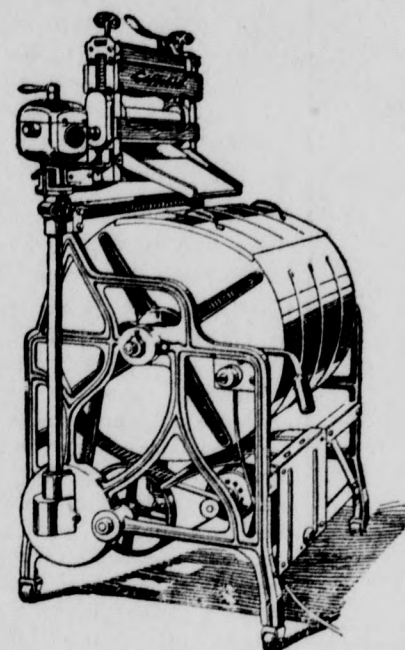

Like other human institutions, capital can be abused. So, too, can eye-sight and health and education and love. Part of America's great job is to remedy and prevent such abuses. Sane people, however, do not cut off their feet to get rid of their corns.

Capital is today's surplus. It is what gives us a better start tomorrow than we had today. If we don't save it, we don't have it, and when we have it, it is useless until it is put to work.

If thrift is right, then it is right that people should acquire funds as the result of their industry and self-denial. But money that is merely hoarded is like water that becomes stagnant; it is harmful, not helpful. When money is put to work, it is like water power; it turns the wheels of industry, increases employment and raises the general level of comfort.

When every producer can create a surplus and that surplus can be gathered into a common fund and put to work for the common good we shall have reached an ideal condition—From "The Greatest Family in the World."

# LAST DAY Saturday

Why be without a COFFIELD when you can have one of your own at this AMAZINGLY LOW PRICE.

For more than 18 years the COFFIELD has been lightening washday's labor..

Over a million housewives now appreciate the in-built qualities that make the COFFIELD washer apart from the crowd. It washes the dirtiest clothing clean and does the finest fabrics without injury. It does all the work—washing and wringing, from the tub, the rinse and the blue. It requires no attention, no lubrication and only the most simple adjustments occasionally to keep it running week after week for years.

## Remember

this offer expires soon

MAIL COUPON TODAY

This wonderful, generous offer closes sharply at 9 p. m. Saturday, September 15, so send in the coupon or telephone Main 120 without delay—just six days remaining for you to secure a brand new

## GREATEST SHOW ON EARTH HERE SOON

World's Ten Times Biggest Circus—  
Ringling Bros. and Barnum & Bailey Headed This Way.

The world's one big circus—Ringling Brothers and Barnum & Bailey Combined—draws nearer and on its hundred cars will come "ten thousand wonders" to exhibit in Los Angeles Sept. 12 to 16 inclusive.

World toured and world conquering this truly Greatest Show on Earth is now fully a third larger than it was when it last visited this locality.

In addition to the many innovations offered then, the present season's program numbers ten more trained wild-animal displays—making thirty in all—and the most superb trained horse acts that Europe has yet produced. The wild-animal and equine displays of the past were introduced merely that the Ringling Brothers might judge of their popularity. So enthusiastically were these numbers received that the famous showmen immediately arranged for the purchase of the world's finest acts of this kind. An entire equine circus was bought outright and brought to this country last winter. And while the Ringling Brothers and Barnum & Bailey agents were securing this and the trained tiger, polar bear, lion, leopard and

jaguar groups, they had orders to engage the foremost men and women performers of the European capitals. And these stars from city and jungle are all to be seen with this wonder circus of 1923. More than 700 men and women, embracing the world's foremost acrobatic stars take part. These artists include the very biggest acts ranging from extensive companies of foreign performers to the amazing English family of Nelsons—positively one family consisting of father, mother, six daughters and one son. And this group of world-famous acrobats but illustrates the remarkable scope of the human side of this great circus.

There are 100 clowns. Aside from the ferocious beasts, the program includes forty trained elephants. There are five companies of trained seals, many dogs, bears, monkeys, pigs and pigeons. Added for good measure, is the mammoth menagerie of more than 1,000 animals. It is the biggest circus program the world has ever seen, given under the largest tent.

### SUGGESTIONS FOR BEAUTIFYING OUR CITY

(By Jessie Ward)

Much has already been said and done to prove the idea of making Sierra Madre famous as a wisteria city. And now that we have made such a fine beginning let's all get together and work for that end. It will take time and effort but the results will be worth while.

Wisteria vines are rapid growing and give abundant shade in the summer and because they lose their foliage in the winter they do not shut out the winter sun. Seedling vines that are making rapid growth each year are generally very slow in producing blooms. Therefore it is much better to plant grafted vines which bloom almost immediately.

For those who object to the deciduous habit of the wisteria vine and wish to have something attractive on their pergola at the time the wisteria is devoid of foliage, various vines can be planted in combination with the wisteria. But have plants at least eight feet apart.

#### Good Combinations

Pink ivy geranium: A well known trailing variety of geranium which will climb if trained. The variety, Charles Turner is the best.

Bignonia Venusta: A gorgeous winter flowering vine with habit of growth similar to the wisteria. Its bright orange tubular shaped blossoms cover the vine during the winter months at the same time that the leaves of both itself and the wisteria are falling. It will remain in flower until the wisteria begins to bloom. This vine does exceptionally well in Sierra Madre.

Kennedy or Hardenbergia: A very choice, delicate growing vine whose blossom resembles a miniature purple wisteria. It blossoms during the winter and spring months and is of unusual beauty. Not only the blossoms are attractive, the foliage as well is fine looking every day of the year. The vine never becomes rank in its growth, so can be used where space is limited.

Climbing Cecil Bruner: For the large pergola this well known climbing rose could be beautifully combined with wisteria. Its soft, pink blossoms harmonize perfectly with the purple wisteria. The vine is very rank in growth and should only be used where there is plenty of room.

Corezema Illicifolia: A choice and striking climbing shrub of delicate growth. Its blossoms resemble small pansies and are shaded from cerise to orange. It blossoms all winter. The foliage is evergreen and resembles small holly leaves.

Flowering Quince: Although not a vine this shrub should be mentioned here as it is a very desirable plant to combine with the wisteria. It can be planted near the wisteria vine. It blossoms in the winter and early spring.

#### Tree Planting Suggestions

Because Sierra Madre is so happily situated in a comparatively frostless belt, we can and should grow some of the more tropical trees that cannot be grown elsewhere. Two of these trees of unusual beauty are the Jacaranda tree and the red and pink flowering eucalyptus.

The same holds true with the vine Bignonia Venusta. It can not be grown everywhere. It is in full bloom during the winter months when flowers are scarce. A good specimen of this vine is growing on the residence of A. D. Clough, formerly Dr. Lee's home, at 155 North Baldwin.

#### Ground Cover for Parkings

Let us plant our parkings with some desirable cover. As blossoms in the parkings are rather difficult to care for, we can substitute the pink ivy geranium. They are very drought resistant and bloom continuously. However, it will more than pay to water them frequently if you desire fine blooming plants with glossy green foliage. Imagine what a wonderful sight it would be to our eastern friends who arrive here direct from their snow-covered homes and see brilliant parkings of geraniums as far as the eye can see. An impression like that might inspire them to return again—to stay.

Other good ground covers for parkings are lemon-yellow Gazania,

### COUNTY TAX RATE LOWER THIS YEAR

The board of supervisors on Tuesday fixed the county tax levy for the fiscal year. The rate for general county purposes will be 68 cents on \$100 assessed valuation, a reduction of 8 cents from the rate of last year. This includes \$100,000 to be used in conjunction with the railroads for separation of grade crossings throughout the county and \$100,000 towards the county's share of building the six viaducts over the Los Angeles river, viz.: Macy, Ali-so, First, Fourth, Seventh and Ninth streets.

The district road tax levied on property outside of incorporated cities will be 35 cents on \$100 assessed valuation, a reduction of 10 cents from the present rate. The reduction in the combined road and county tax rate this year will be 18 cents.

The reduction in the road tax is largely on account of the greatly increased assessed valuation in the First and Fourth Supervisorial districts on account of the oil fields at Santa Fe Springs, Signal Hill and Torrance. The increase in the assessed valuation of these two districts for the year is \$90,082,299, for property outside of incorporated cities. These figures do not include any levy for local improvements such as lighting districts, road improvement districts, school districts, etc.

#### Entering the Sere and Yellow.

Measure your health by your sympathy with morning and spring. If there is no response in you to the awakening of nature; if the prospect of an early morning walk does not banish sleep, if the warble of the first bluebird does not thrill you, know that the morning and spring of your life are past.—Thoreau.

Trailing Lavender Lantanas and Verbenias; but if uniform parkings could be planted at least in every block, it would be much better landscaping and make more of an impression.

#### Flowers for Tournament Float

Before it is too late we must think about growing flowers for our float for the Pasadena Tournament on New Year's Day. We will need a lot of flowers and every one could do his or her bit towards making up the sufficient amount.

Sweet peas and stocks will be practical to grow if planted very soon now. Sweet peas can be grown from seed and stocks either from seed or young nursery plants.

Other flowers that will bloom at the right season for the float are roses, narcissus, snapdragon and violets.

The colors needed will be purple, blue, pink, white and lavender.

Prizes will be given to the three school children who bring in the most flowers for the float. These flowers to be on hand December 31 and must be either stocks, sweet peas, roses, snapdragons, white narcissus or some other flower approved by the float decoration committee. The colors must be pink, purple, blue, lavender or white. The prizes will be as follows: First prize, \$10; second prize, \$5. Start your plants now, or they will bloom too late.

### IMPROVED FORD MODELS NOW ON PRODUCTION

Closed and Open Models Are Made  
to Look Better and Give  
More Room

Introduction of a higher radiator, bringing new and improved body lines to all types of Ford cars, is announced by the Ford Motor company. The changes have just gone into effect and the various types are now in production, according to Milton Steinberger, local dealer.

While the larger radiator has been made standard on all types and while it has made possible other betterments in body design, there is no radical departure in construction, but rather a general improvement which has resulted in more graceful lines.

The new radiator sets an inch and a half higher than the former and has an apron at the bottom which joins a similar apron effect of the fender on either side, giving a highly finished appearance to the front of the car. The larger radiator also increases cooling efficiency.

#### Coupe Makes a

Most conspicuous among the new types is the Ford Coupe which is of entirely new body design and construction, resulting in a more trim exterior appearance, more comfortable seating arrangement and a greater luggage carrying capacity.

The gasoline tank is under the seat, with divided cushions to afford easy filling of the tank from the right side, making it unnecessary for the driver to leave his seat. Ventilator in the cowl and a visor over the windshield add more to the attractiveness of the car. A new rear fender of more sturdy character also is a new feature.

Interior fittings are of choice material and the arrangement of the deeply cushioned seat has been effected so that at the rear there is a small recess shelf for carrying parcels. The rear vision window is much larger and oblong in shape. Door windows have been equipped with revolving type window regulators and door locks are provided. Side windows are equipped with the lever type window lifters.

Marked, too, is the improvement in the Four Door Sedan. Highly popular since its introduction a year ago, because of its low, graceful lines, the car now presents even much better lines and a sturdier appearance.

#### More Leg Room

This has been brought about by the installation of an entirely new cowl with a graceful sweep from the dash blending into the larger hood and radiator. The change also affords an increase in leg room for occupants of the front seat.

In the open type, the Touring Car and Runabout, the cowl has been enlarged and flows in a graceful curve to the higher hood. The result brings a most pleasing effect to the exterior appearance of both types.

The improvement in the Touring Car which came when the one man top and slanting windshield were introduced, is greatly enhanced by the larger radiator, the car appearing lower and more attractive than ever. The effect on the roadster is likewise most appealing, giving it a more rugged and sturdy appearance. The new radiator also is extended to the truck chassis, affording improved and better cooling to delivery services.

These new Ford types and the generally recognized performance ability of the Ford under all motoring conditions, promise to bring a greater demand than ever before as the public becomes more fully acquainted with the higher standards and greater values which have been incorporated. No changes are contemplated in prices.

A man should never be ashamed to own that he has been in the wrong; it is but saying in other words that he is wiser today than he was yesterday.—William Penn.

#### English as Spoken

Overheard at a directors' meeting: "While we are sitting here let us see how we stand on running expenses."—Boston Transcript.

NEWS WANT ADS PAY

### READY FOR "WAYFARER" OPENING SATURDAY NIGHT

Successful in every particular was the first joint rehearsal of the cast and chorus of "The Wayfarer" held in the beautiful Los Angeles Coliseum where, starting Saturday night and running through September 15, exclusive of Sunday, the 9th, more than 7000 persons will appear in this great all-American passion pageant.

Director Montgomery Lynch, who has produced "The Wayfarer," in three other large cities, led the thousands under him through all the milestones of history, and while they were not in costume, and even though it was the first time that the dramatic cast had met with the chorus of 4000 singers, history did not lag. No attempt was made to produce the effects of a battle in the prologue, and the foreign contingents were not present to participate in "The March of Nations," the great climax.

But every detail necessary to the actual theme of the play was acted and reacted, until Lynch was quite satisfied that the players would be able to go through the dress rehearsals Thursday and Friday evenings without stopping for serious corrective instruction. Hugo Kirchhofer, assistant to Lynch in directing the chorus, and Maestro William Tyroler, assistant dramatic coach, were paid high tribute by the noted director for the efficient manner in which they have aided him in perfecting the great cast.

### COL. WILLIAM J. BRYAN TO LECTURE IN PASADENA

The United Church Brotherhoods of Pasadena have secured Col. William Jennings Bryan for a lecture which will be delivered in the Rose Festival stadium on the afternoon of the 15th inst. There will be a preliminary musical program of more than ordinary excellence, commencing at 2:30 o'clock, and the lecture will start at 3:15 sharp.

The subjects to be covered will be "World Problems" and "The Eighteenth Amendment," both of which have a particular appeal to every thinking man and woman of the present day. Because of natural equipment, life-long study and wide experience in the conduct of public affairs both at home and abroad, Col. Bryan is peculiarly qualified to illuminate these subjects and everyone who possibly can should make a point of hearing his exposition of them.

Tickets will be on sale at the office of the Pasadena Chamber of Commerce all through next week and those who have any choice in seats will do well to make their selection as early as possible. Prices will be 99 cents, 75 cents, 50 cents and 25 cents each according to location, ranging from the loges in the immediate front to the top of the amphitheater. Every seat sold will be well within the range of the ordinary speaking voice so there need be no fear on that score.

#### Undue Scrupulousness

Tenderness of conscience is always to be distinguished from scrupulousness. The conscience cannot be kept too sensitive and tender; but scrupulousness arises from bodily or mental infirmity, and discovers itself in a multitude of ridiculous, superstitions, and painful feelings.—Cecil.

#### Witches

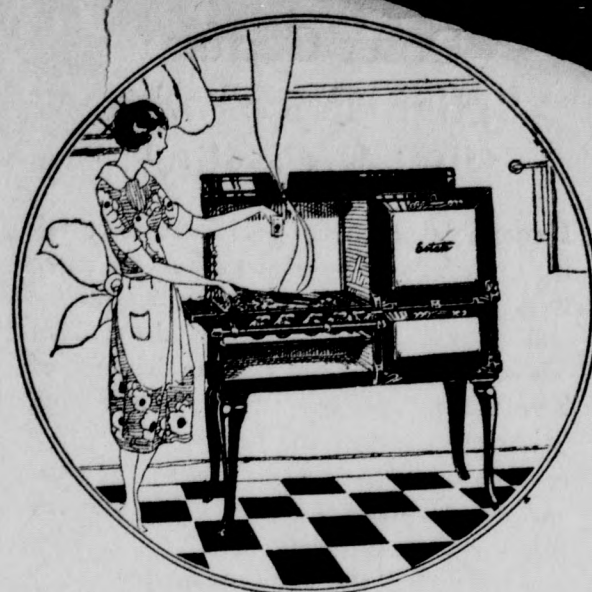

Witches became officially dead by an act passed in George II's time, but pretending to exercise witchcraft was made a punishable offense. The last executions for witchcraft in England took place in 1716, when Mrs. Hickes and her daughter were the victims. The last in Scotland were in 1722, and the act referred to was passed six years later.—London Tit-Bits.

**CITRUS GROWERS WILL  
VIEW OVERHEAD SPRINKLERS**  
Annual Field Day of Farm Bureau  
Will Include Visit to  
Sierra Madre

The overhead irrigation system installed by Charles Brooks on his citrus orchard and his summer cover crop, are to be the object of interested study on the part of Southern California Citrus growers when the First Annual Field Day of the citrus growers department of the Los Angeles County Farm Bureau and the Agricultural Extension service visits Sierra Madre on September 11.

The field day marks the completion of the first year's work of the department and of five years of work of the Agricultural Extension service with citrus growers in Los Angeles county. Stops have been arranged to study the results of long time plots established in the county, including pruning, topworking, inarching gophered trees, treatment of trunk and root diseases, etc. A special feature has been arranged at Covina where a stop will be made to look over the poultry-citrus combination that has been tried on a five-acre orchard with 500 hens for the past three years.

The stop at noon will be made at the San Dimas Canyon dam for a picnic lunch. The Farm Bureau has made arrangements to supply coffee and trimmings. After a short annual meeting of the department and a discussion of the flood control and water conservation problems of the county the tour will continue visiting orchards during the afternoon.

The tour will start at the Sierra Madre-Lamanda Park association packing house at 9 a. m. and after visiting a plot to study methods of rebuilding frost injured lemon trees in East Pasadena will proceed to Sierra Madre, arriving at the Brooks ranch at 11 a. m. All citrus growers are cordially invited to take the trip.

## THE NEWSPAPER —a Community Builder

A newspaper is of vital force in the upbuilding of this community. It not only sends the message of our town to people in other places but it molds thought and opinion at home. Both are important phases of community life. No other influence is so far-reaching—no other spoken or written word reaches so many local people.

—A good newspaper is an asset  
to you personally

It helps the community in which you live to be a better community. It works for economical government. It advances every improvement. It upholds the right—decries the wrong. That means much to the community—to the place where you have your home. It keeps the best thought in the minds of the people. It is the champion of betterment—better living conditions, better homes, better streets, better institutions, better business.

—This newspaper and its prosperity mean a better Sierra Madre—a better town for you to live in

**A Patch No Sign of Poverty.**  
Every thrifty farmer keeps his land well dressed, but he has no reason to be ashamed of a strawberry patch.—Boston Transcript.

**Worst of All Liars.**  
Half a fact is a whole falsehood. He who gives the truth a false coloring by his false manner of telling it, is the worst of liars.—E. L. Magoon.

**Sleep With Head to North.**  
A belief common in Japan is that to live long one should sleep with the head pointed due north.

**Vegetables raised in the Arctic.**  
Traders have raised carrots and cabbages in the Mackenzie delta, fully 100 miles north of the arctic circle.

## Low Fares Four Routes EAST

## WHO INFLATED THE CURRENCY?

George E. Roberts Gives Common Sense Explanation for Currency Increase and Decrease.

### GOVERNMENT TOOK NO PART

Due to Changes in Supply, Demand and Prices of Commodities Caused by War—Federal Reserve Not to Blame.

The mistaken notion that the currency is inflated and deflated by the government in the United States from motives beyond the understanding of average people is effectually set at rest by George E. Roberts, noted banker and exponent of sound money, in an article in the Journal of the American Bankers Association.

"There has been inflation by the governments of Germany and other European countries, which have issued money for the purpose of paying their expenses," Mr. Roberts says. "The United States Government has done nothing of this kind since the Civil War."

"There is a genuine need for elasticity in the volume of currency, and for machinery to adjust it to the legitimate needs of the country. The means provided are the Federal Reserve Banks, authorized to issue currency to their member banks, either in payment of deposits or for loans."

**Side-Tracked Like Freight Cars**  
"More currency is needed in September, October, November and December than in January and February. As business slackens, currency naturally retires from circulation. Money accumulates in the member banks and they send it in to the Reserve banks, which in effect retire it, as freight cars are retired when traffic falls off."

"What caused the great inflation of credit and currency? It was due primarily to the war, which made extraordinary demands upon the industries and caused a great rise of wages and prices. It was inevitable that more credit and money would be called for to carry on business."

"The boom year of business that followed the armistice was likewise abnormal. The end of the war released a great many demands that had been held in check. The foreign demands upon us at first increased. There was a temporary stimulus, but the volume of business was abnormal and could not be sustained. Agricultural production in Europe revived, the prices of agricultural products moved back toward normal, importations from the United States fell off, prices declined, 'deflation' began."

"Some say 'inflation should not be permitted,' but if war occurs inflation is unavoidable. Recruiting armies makes a labor scarcity. Contractors bid above going wages to attract men. The war industries did the same and the peace industries raised wages to hold their men. Governments of Europe sent representatives to this country to buy food and they bid up prices on the grain exchanges. Higher levels of wages and prices meant that more credit and money was required to handle business."

**More Business, More Money**  
"The increased issues of currency was a result of allowing business to go ahead, upon the rising level of wages and prices. When a factory payroll doubled, twice as much currency had to be furnished for it. When cotton rose from 10 cents a pound to 30 and 40, more currency was required to handle the crop, and so all around the circle."

"Deflation did not come by an act of the government or the Federal Reserve authorities in suddenly withdrawing money from circulation. Deflation came naturally when business fell off and prices declined. Just as an increasing volume of business at higher prices called more currency into use, so a decreasing volume of business at lower prices released currency from use and caused it to return to the Reserve banks."

"There has been absolutely nothing new or strange in these price movements related to the war. Inflation and deflation have been just as always when wars have occurred. The only new factor has been the population. That is always being renewed, and most people do not learn by the experience of others. When hard times come it is always the thing to lay the blame on somebody, and this time the Federal Reserve System has taken most of it."

### AMERICAN SAVINGS INCREASE

New York.—Continued increase in the savings of the American people is indicated by the latest national compilation just completed by the Savings Bank Division of the American Bankers Association. Savings deposits in banks and trust companies of the United States were reported at \$17,300,000,000, June 30, 1922, the last available nation-wide figures, as compared with \$16,620,000,000, June 30, 1921. This is an increase of \$680,000,000 or 4.1 per cent.

The number of savings depositors, as indicated by the number of accounts, shows an increase of 4.9 per cent, with the states reporting for the first time in 1922 excluded. The third annual report of the Savings Bank Division on school savings banking also shows increased American thrift. 1,271,000 people have savings accounts during the year ending June 30, 1922, as compared with 1,221,000 in 1921.

### WOMAN'S CLUB NOTES (Correspondence)

At the board meeting on Tuesday next at 9:30 the formation of a Junior League will be considered. This new department of federation work is in the interest of little girls from 10 to 18 years old, and provides cultural interests, incentives and opportunities for them, particularly in art, music and the dramatic lines.

A committee will be appointed to provide a dancing school for children.

Women wishing to join the club may receive all necessary information by telephoning Mrs. R. S. Jensen, Green 32. Members will please notify Mrs. Jensen regarding all new comers who might wish to be welcomed into the club. Suggestions from members as to programs and policies will be welcomed by the board.

An announcement of great importance to the club and the community will be made at this meeting.

Details regarding the wisteria stationery will be available, a charming design having been submitted by Mrs. Tuttle. Personal and business stationery in convenient quantities will be sold to local shops and to individuals, providing attractive advertising for Sierra Madre and adding to club revenues also.

A delightful farewell party was given in honor of Mr. and Mrs. Coye on August 28 at the home of A. L. Phelps in Canyon Park. The Coyes have lived in the canyon the past nine months and are now removing to Pasadena for the winter. The party included Mr. and Mrs. Phelps, Mr. and Mrs. Key, Mr. and Mrs. Bradford, Mr. and Mrs. Ward, Mrs. Fugitt, Mr. and Mrs. House, Mr. and Mrs. Herrington, Mr. and Mrs. Walsworth, and Mr. and Mrs. Phelps.

### MAX SILVERMAN PUTS ON REGULAR AUTUMN SALE

Max Silverman, proprietor of the Sierra Madre Bargain Store is putting on his regular autumn sale of a big variety of garments and haberdashery, for men, women and children. Special low prices are the order of the day, to stimulate buying and give parents a chance to save money on many items for the children's school wear. With each sale a free portrait coupon is given to the customer.

On account of the Jewish New Year the Sierra Madre Bargain store will be closed all day on Sept. 11 and on Sept. 20.

## Why Yosemite Lodge Ranks FIRST

Built to banish care, Yosemite Lodge—the center of life in Yosemite Valley—has the best of everything for you, good food, good accommodations and good service, at moderate prices.

The superiority of "The Lodge" is acclaimed each season by 20,000 guests.

You may have your choice of several types of "cabin homes" under the restful pines—all of them are completely comfortable and electrically lighted, and many have private baths and screened sleeping porches.

Spacious verandas of The Lodge's main building, gay with visitors from many countries, invite you to join some happy party.

Or, there is the Swimming Pool, 120 feet long and bordered by a sand beach, for your diversion.

And at night you hear clever entertainment and dance out-of-doors under the stars on a good floor to the music of an orchestra.

Don't miss Yosemite in August and the Indian Summer. Come up—NOW—to joyous days and cool, crisp nights. Only now are all roads and trails open.

## Could Not Digest the Wire

The contents taken from the stomach of a large East African crocodile recently shot in Tanganyikan territory include some curious and gruesome relics. Apart from antelope hoofs, tortoise shells and porcupine quills there were a large number of metal bangles such as are worn as bracelets and anklets by native women, beads and a long strand of wire. The strand of wire solved the mystery of the disappearance of a native boy. The lad was in the habit of gathering wood along the river bank and tying up his faggots with a bit of wire. The wire cord found in the crocodile's stomach was only too sure an indication of the fate of the unfortunate boy.

## Irish Opera by German.

It is strange that one of the most "Irish" of Irish operas should come from a German musician, but it is nevertheless a fact that the typical Irish opera, "The Lily of Killarney," was composed by a German, Julius Benedict. But Benedict, says the Morning Post, was a clever man, and the Irish idiom in its broad aspect is easy to assume. While speaking with an Irish accent he said many beautiful things, and the airs "Eileen Mavourneen" and "I'm lone" would give distinction to any opera that dealt in melody, and sixty years have not dimmed the charm of Benedict's melodies.

## Latin Words in English Language.

Nearly one-third of the words in the English language are of Latin origin. Anglo-Saxon was spoken in England until the coming of William the Conqueror in 1066. With the Norman Invasion came the introduction of French into the English language. Several thousand of the French words were Latin with a few alterations. Later a still larger number of Latin words were introduced into the English language.

## Sports and Prayers.

The first "Book of Sports" was published by James I in 1633, to tell of lawful pastimes on Sundays after evening prayers.

## "BUSY BEE" RESTAURANT PUTS ON NEW FRONT

Charles Ellis, proprietor of the restaurant until recently operated by Mr. and Mrs. Clarence Garrett, has changed the name to the "Busy Bee" and is making just as complete a change in the front and the interior arrangement. He has taken the space occupied by Mrs. Hanshaw before she moved her beauty shop to the Central Garage Building. Taking out the old front completely, he has put an attractive face on the room and now has a large, light room for the accomodation of his growing trade. Mr. Ellis is much pleased with the prospect of a good business in Sierra Madre, based on his experience so far.

## U. S. C. HAS HEAVY SCHEDULE IN FOOTBALL

What is undoubtedly the most strenuous season in the history of football at the University of Southern California faces Coach Elmer C. Henderson and his Trojans this year. The schedule brings the Cardinal and Gold pig-skinners up against every strong team on the Pacific coast, and it is known that dickering are being made to schedule a game with a representative Eastern or Middle Western eleven for December 8.

There is probably not another eleven in the Pacific coast conference which faces so many powerful teams as Henderson's men must go up against this year. Practice starts on September 15, and two weeks later, September 29, the first game is with the California Institute of Technology. This, and the Pomona game a week later, are considered the easiest games on the Trojan schedule. The Pomona game, it is planned, will dedicate the new Los Angeles Coliseum.

On October 13 the squad meets Nevada, and last year the Wolves gave Henderson's men the scare of their lives. This game will be hard fought throughout and will be so hotly contested that there is a strong chance that one or two of the squad's best men will be injured. On October 20 the team plays the University of Washington in Seattle. This should be the hardest fought game of the season.

Coming down to the coast, Henderson's team stops off at Palo Alto to play Stanford on October 27. Andy Kerr will have a defensive team, and if the Trojans are weakened as a result of their Seattle game the contest is liable to end in disaster for them.

On November 10, in the Coliseum, the squad plays its most important game of the year with the University of California. This game will probably determine the championship of the Pacific coast and will create more interest than any game ever played in Los Angeles.

The season draws to a close with the Arizona game on November 17, and Idaho on November 24, both games to be played in the Coliseum. The Vandals from Idaho rate as second strongest team in the Northwest, and this game should develop into one of the best of the season.

## STANDARD OIL STATION AT SIERRA MADRE GARAGE

Selling nothing but Standard Oil gasoline and lubricants, the Sierra Madre Garage is now a regularly appointed Standard Oil Service Station. For some time it has been rumored that Standard Oil was about to establish one of their own stations here, having made inquiries into the price of various sites. Milton Steinberger has now entered into a contract to handle Standard products exclusively and it is understood the company will not come here with a station of their own. Standard Oil coupon books are honored not only for Red Crown Gasoline but for Zeroline and other Standard products. As a result of the new alliance, all the pumps and oil tank equipment of the Sierra Madre Garage have been painted red, white and blue to conform to the color scheme of the company stations.

## NEWS WANTADS PAY

## Object of Greatest Admiration.

There are nine or thirteen million things in this well-known republic that elicit our admiration; none, however, more than the woman who does her own work and still has time to keep her oldest daughter at her piano lesson!—Buffalo Evening Times.

## Egyptian Girl's Faded Early.

In Pharaoh's time, Egyptian girls were married before they were fourteen, and among the lower classes were mothers at fifteen, grandmothers at thirty and wrinkled old women when they were forty.

## Shoe Thrift Week

Have 'em Repaired

Look in your closet today for your shoe cast-offs. If the uppers are good we can make the shoes as good as new at nominal cost.

Mothers should see that their children's shoes are sent to the repair shop this week so they will be ready for school wear.

You'd be surprised at the good service that remains in many a pair of shoes that have been thrown away as being of no more good. Folks who wouldn't think of tossing even a penny into the trash can, sometimes thoughtlessly cast aside a pair of shoes that still have several dollars worth of wear and comfort in them if properly repaired. Don't throw away your old shoes until they have been condemned by the repairman. Be Thrifty—Have 'em repaired.

You don't throw away your watch because the mainspring breaks. Why throw away your shoes because the soles wear through?
